 - Document 4: JP 2003-108539 A (Hitachi Kokusai Electric Inc.), 11 April 2003 (Family: none)

The invention set forth in claims 1 to 3, 8, and 9 does not involve an inventive step in the light of the invention disclosed in document 1 cited in the international search report. A comparison of the invention set forth in claims 1 to 3, 8, and 9 and the invention disclosed in document 1 reveals that the two differ in that (a) the invention set forth in claims 1 to 3, 8, and 9 is characterized by storing a script file specified by a script language in a semiconductor integrated circuit device, whereas the invention disclosed in document 1 is characterized by storing a program in a communications device, and (b) in the invention set forth in claims 1 to 3, 8, and 9, script

International application No.
PCT/JP2004/009194

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

file management is opened to the user, but firmware management is restricted.

As regards difference (a), a person skilled in the art could easily conceive of using a script language as the program.

As regards difference (b), restricting user access to specified data is a known constitution, and thus, a person skilled in the art could appropriately allow management of a script file by a user while restricting management of firmware.

Moreover, it is obvious that the communications device disclosed in document 1 is equipped with firmware.

The invention set forth in claims 4 and 5 does not involve an inventive step in the light of document 1 and document 2 cited in the international search report. A person skilled in the art could easily conceive of equipping the communications device disclosed in document 1 with the Web server function disclosed in document 2 (page 5, left column, lines 22 to 36, for example).

The invention set forth in claim 6 does not involve an inventive step in the light of document 1 and document 3 cited in the international search report. A person skilled in the art could easily conceive of equipping the communications device disclosed in document 1 with the USB mass storage class access feature disclosed in document 3 (page 2, right column, lines 29 to 42, for example).

The invention set forth in claim 7 does not involve an inventive step in the light of document 1 and document

PCT/JP2004/009194

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
4 cited in the international search report. A person
skilled in the art could easily conceive of equipping the
communications device disclosed in document 1 with the
time information acquisition feature using SNTP disclosed
in document 4 (page 2, left column, line 42 to right
column, line 1, for example).

International application No.
PCT/JP2004/009194

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1 to 9 state that "management of the aforementioned script file is opened to a user, but management of the aforementioned firmware is restricted," but it is unclear what specific processes are meant by said "opened" and "restricted."
